

## Developing the Minnesota Cancer Plan Step 2: Recommend Objectives and Strategies

**Workgroup:** Survivorship  
**Date:** 6/22/2016

**Objective:** Make cancer rehabilitation and cancer exercise accessible to all cancer survivors who need these services regardless of demographics and ethnicity

### Desired Outcome:

At the end of five years, what would you like to accomplish? 1. Major medical training programs in MN having course work in Cancer Rehabilitation and Cancer Exercise. 2. Establish Leaders in PMR and Oncology at Major Medical Training programs in MN to work across barriers to create interdisciplinary solutions to cancer rehab referrals and care. 3. Establish criteria/qualifications for community facilities claiming to be cancer exercise programs. 4. Develop innovative technologies and legislative initiatives for remote services such as telemedicine and computer platforms for cancer rehab and cancer fitness/wellness. 5. Require state programs receiving funding for survivorship to evaluate for physical impairments after cancer treatment and develop referral pathways for services. 6. Work with underserved ethnic groups/races to ascertain the barriers to receiving cancer rehab and cancer exercise/wellness services and adapt strategies to meet these needs. If you do not expect to achieve the objective by the end of five years, what would success look like? Any progress toward these initiatives.

### Alignment:

Partners currently working on this objective and type of activity:

Organization	Activity (such as PSE change, education, programmatic)
University of MN survivorship services	Education regarding Ca rehab and ca ex spec
Mayo Survivorship services	“
Department of PMR U of MN	“
Department of PMR Mayo	“
Other medical training programs	“
ACS	Work with state and national staff re Ca Rehab
The Art of Well	
Gilda’s House	

## Strategies

**Strategy #1: Work with major medical training programs in MN to develop course work in Cancer Rehabilitation and Cancer Exercise**

**Indicator to measure progress (such as increased number of engaged stakeholders, increased media events, increased number of local jurisdictions that pass policy):**

**Rationale:**

**This is an \_\_\_\_ evidence-based practice \_\_\_\_ promising practice \_\_\_\_ other. Please explain.**

**Does this strategy promote health equity by addressing a racial, economic, geographic or other barrier? If yes, explain.**

**Rank this strategy for the greatest potential for traditional and non-traditional partners working together.**

**Rank \_\_1\_\_ of \_\_\_\_ strategies**

**Strategy #2: Establish Leaders in PMR and Oncology at Major Medical Training programs in MN to work across barriers to create interdisciplinary solutions to cancer rehab referrals and care**

**Indicator to measure progress (such as increased number of engaged stakeholders, increased media events, increased number of local jurisdictions that pass policy):**

**Rationale:**

**This is an \_\_\_\_ evidence-based practice \_\_\_\_ promising practice \_\_\_\_ other. Please explain.**

Does this strategy promote health equity by addressing a racial, economic, geographic or other barrier? If yes, explain.

Rank this strategy for the greatest potential for traditional and non-traditional partners working together.  
Rank \_\_\_ of \_\_\_ strategies

Strategy #3:

Indicator to measure progress (such as increased number of engaged stakeholders, increased media events, increased number of local jurisdictions that pass policy):

Rationale:

This is an \_\_\_ evidence-based practice \_\_\_ promising practice \_\_\_ other. Please explain.

Does this strategy promote health equity by addressing a racial, economic, geographic or other barrier? If yes, explain.

Rank this strategy for the greatest potential for traditional and non-traditional partners working together.  
Rank \_\_\_ of \_\_\_ strategies

Strategy #4:

Indicator to measure progress (such as increased number of engaged stakeholders, increased media events, increased number of local jurisdictions that pass policy):

Rationale:

This is an \_\_\_ evidence-based practice \_\_\_ promising practice \_\_\_ other. Please explain.

Does this strategy promote health equity by addressing a racial, economic, geographic or other barrier? If yes, explain.

Rank this strategy for the greatest potential for traditional and non-traditional partners working together.  
Rank \_\_\_ of \_\_\_ strategies

Strategy #5:

Indicator to measure progress (such as increased number of engaged stakeholders, increased media events, increased number of local jurisdictions that pass policy):

Rationale:

This is an \_\_\_ evidence-based practice \_\_\_ promising practice \_\_\_ other. Please explain.

Does this strategy promote health equity by addressing a racial, economic, geographic or other barrier? If yes, explain.

Rank this strategy for the greatest potential for traditional and non-traditional partners working together.  
Rank \_\_\_ of \_\_\_ strategies
